GEORGIA DOT RESUMES EDGE PAVEMENT REPAIR IN DADE

TRENTON, Ga. – A Georgia DOT Maintenance crew begins today its work on repairing the deteriorating edges of pavement on State Route (SR) 136 and SR 58 in Dade County. Work will proceed daily Tuesday through Friday between the hours of 7:30 a.m. and 5:30 p.m., weather permitting.

Edge repair is a maintenance activity that is intended to guard against pavement failure along the edges due to the action of traffic and the loss of edge support that occurs due to the presence of water, aggressive-growth vegetation, and wind from either traffic or the atmosphere. Georgia DOT's edge repairs are designed to minimize the effects of shoulder drop offs and maximize the safety of the roadway for the traveling public.

***DriveAlert ArriveAlive** calls attention to an alarming increase in roadway fatalities across Georgia, many resulting from preventable crashes and distracted driving. **DriveAlert ArriveAlive** implores motorists to buckle up; stay off the phone and no texting; and drive alert.
